

Module Structure

Module Title: Crossing Cultures in Food and Beverage

Module Code: HTPM 312

Programme of Study/Year of Study: Hospitality and Tourism Management/Year 3

Group: HTMIII F&B **Semester:** Fall

Number of Hours Taught: 3 per week **ECTS:** 5

Instructor: Jeanne Savva

Office Hours: Wednesday: 12:00 – 13:00

Office Number: 218

Office Tel: 22 404812

email: jsavva@hhic.mlsi.gov.cy

Pre-requisite(s) : Gastronomy and Nutrition

Module Rationale

This module focuses on understanding the intrinsic behavior between people and food, and how the crossing of cultures in food and beverage has an impact on eating patterns. It examines the study of food in behavioral, social, traditional and cultural context, and provides the cultural backdrop to enhance the understanding of food use.

Aims

This module enables students to investigate how food and drink is associated with cultural norms, behaviors and social convention, and examine how identity – religious, ethnic, national – is intensely bound up with food and beverage. The module enables future food and beverage managers to develop their professional ethics and act responsibly in contemporary multicultural environments.

Intended Learning Outcomes

On successful completion of this module, the student should be able to:

1. Examine food origins and how early food habits were determined by geographical and environmental factors as well as historic influences
2. Address the social and psychological determinants of individual food choices and eating patterns and understand how food touches every aspect of human life
3. Understand how people use food to define themselves as individuals, groups or whole societies
4. Develop an understanding of how an individual's food behaviours are shaped by personal experiences (food memory), family traditions (core foods, traditional celebrations and fasting)

and by the foodways of their society and religion

5. Analyse why food is a symbol by exploring the intricate relationship people have with food through the examination of a variety of sources - film, art, photography, literature, cookbooks, journalism and artifacts
6. Provide examples of how food plays many different roles in our lives, for example as a form of entertainment, as a ritual tool and as a means to bind people together in a community
7. Identify the meaning and significance of food in different cultures by exploring the way that ethnicity, gender, socioeconomic status and religion influence food choices and preferences
8. Examine how culture of different countries is transmitted and preserved through food by comparing the cuisines and food traditions of a variety of cultures.

Delivery Methods:

Lectures, overhead transparencies, films, reading of food publications, coursework, group work and presentations.

Assessment:

Coursework: 30%
Research presentation project (Group Work): 30%
Final Examination: 40%

Module Requirements

Refer to the students' manual for the module requirements.

Module Plan and Content

Week	Dates	Topics to be Covered	Reference Chapter / Material
1.	02/10-05/10	Course Introduction: How do individuals define themselves? General thoughts on food, ethnicity and culture <i>Due: Homework 1</i>	Chapter 1 Handouts from Guptill, M.E., Copelton, D.A. and Lucal B., 2013. Food and Society. Cambridge:polity
